

# Super Sports Bot

Make Money on Worldwide Sports

This bot works on worldwide Sports (except Soccer and Horses) on Betfair without any human intervention and makes consistent money.

**Michael & Steve**  
**2/17/2016**

Hi, Thanks for showing interest in Super Sports Bot.

It's definitely a one of its kind betting bot which you will discover today. SSBot works with only Betfair. So, it's important that you have a Betfair account.

Super Sports Bot works on the principle of Stop At A Winner betting. It will continue to bet as long as you either don't hit a profit or a stop loss. **We have exploited this stop at winner concept to our advantage.**

SSBot works on following Betfair markets:-

- Match odds market ( or Money line as some US sports say)

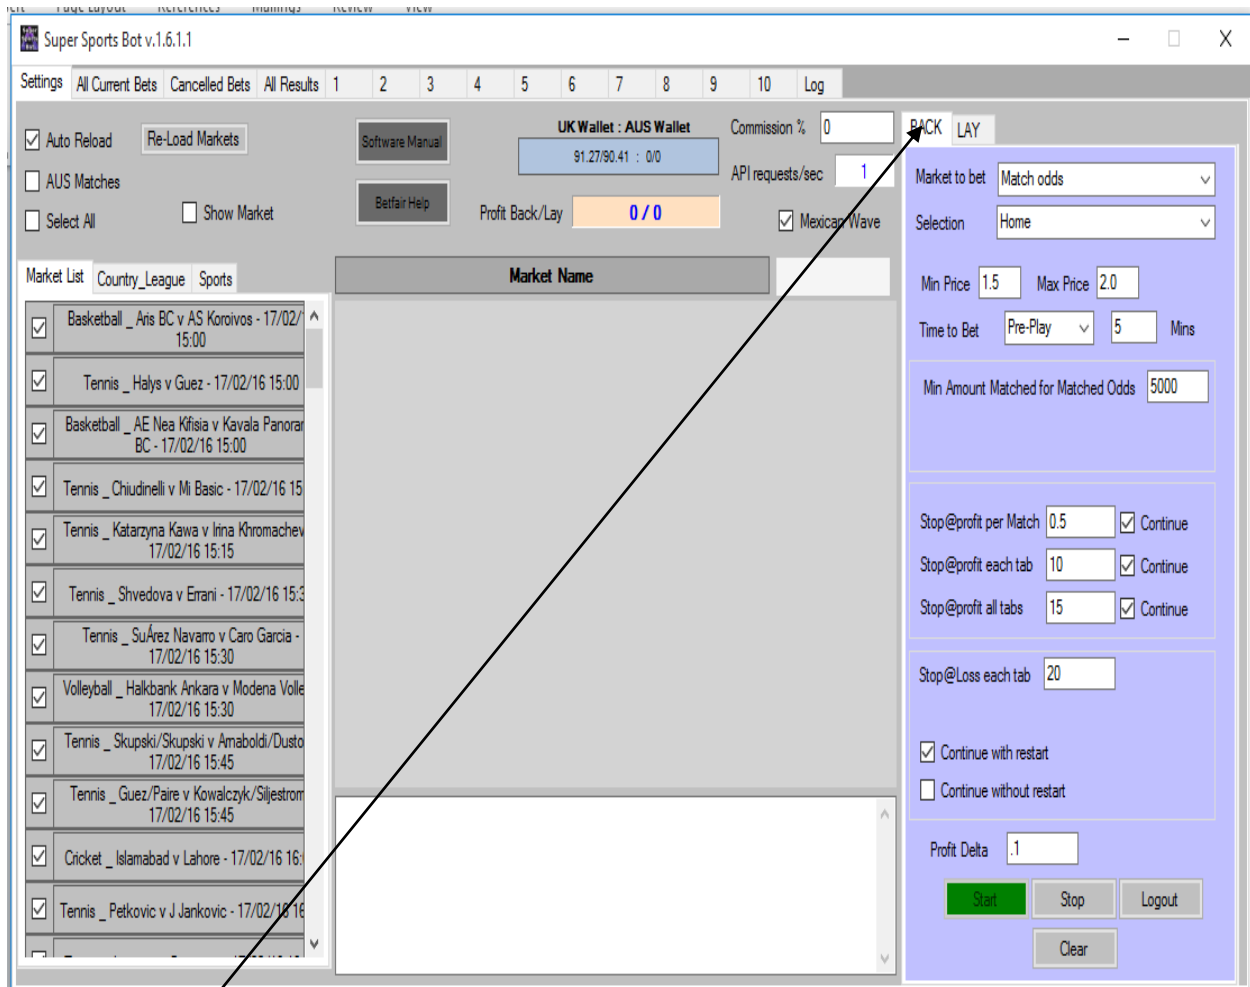

Let's get into more details about the bot-

Once you have purchased the bot and complete the installation and registration procedure, when you click on the desktop icon

You will get the following screen, where you need to input your Betfair credentials.

You will see the following screen once you are logged into the bot with your Betfair account.

On the back side, you can see the values in the above screen. Bot saves the last used settings. In your case, when you open the bot first time, you won't see values first time and you will start from fresh.

Let's get into each function one by one

Market to bet:-

In market to bet option, you can select only one market – Match odds (or Money Line). We plan to introduce other markets into the bot based on the client feedback.

Selection:-

The screenshot shows a web interface for betting. At the top, there are two tabs: 'BACK' and 'LAY'. Below them, the 'Market to bet' is set to 'Match odds'. The 'Selection' dropdown menu is open, showing five options: 'Home', 'Away', 'Draw', 'Favourite', and 'Favourite Home'. The 'Min Price' is set to 1.5. The 'Time to Bet' is set to 'Pre-Play'.

Every market has certain outcomes to bet. For example, Match odds market has Home, Away, Draw, Favorite and Favorite Home.

Important point to understand here: - We have added here “**Favorite**” as another outcome. Favorite means whosoever has the lowest odds between Home and Away and “**Favorite Home**” is means to bet on favorite when only home is favorite. Most of the sports don’t have 3<sup>rd</sup> option in match odds but if it is there then we refer to it as Draw.

Bet will only be placed on the selected outcome for any market provided it is between the minimum and the maximum price range.

The screenshot shows a web interface for betting. The 'Time to Bet' dropdown menu is open, showing two options: 'Pre-Play' and 'In-Play'. The 'Pre-Play' option is selected. The 'Min Amount Matched' is set to 5000. The 'Matched Odds' is set to 3000.

Time to bet – how many minutes before the start of the match or how many minutes after the kick of the match, you want bets to get placed. **I strongly recommend to stick to Pre-Play option as during in play, prices change too frequently.**

The screenshot shows a web interface for betting. The 'Min Amount Matched for Matched Odds' field is set to 5000.

It is important to know that we can’t bet on every match, as not every match has enough liquidity and therefore, the prices may not be accurate in that Betfair market. Hence we need **Minimum Amount matched option**.

In this box, you can keep the minimum amount which needs to be matched in match odds market in order for the match to be qualified.

Stop@profit per Match	<input type="text" value="1"/>	<input checked="" type="checkbox"/> Continue
Stop@profit each tab	<input type="text" value="10"/>	<input checked="" type="checkbox"/> Continue
Stop@profit all tabs	<input type="text" value="20"/>	<input checked="" type="checkbox"/> Continue

Above settings are very important to understand. I have not spoken about the tabs yet, which I will cover later.

Stop@Profit per match is the amount which you want to make from each winning match.

Stop@profit each tab is the amount of profit which you want to make from each tab.

Stop@profit for all tabs is the overall amount of profit which you want to make from the bot overall

Super Sports Bot v.1.6.1.1														
Settings	All Current Bets	Cancelled Bets	All Results	1	2	3	4	5	6	7	8	9	10	Log

In this bot, you will also have one of the finest features which have increased the profitability of the bot exponentially. Here you can run (up to 10 cycles) for Stop At A Winner Betting. It has ten tabs as you can see on the screenshot above.

Each tab is independent of any other tab.

Let's get into any one tab,

Settings All Current Bets Cancelled Bets All Results 1 2 3 4 5 6 7 8 9 10 Log													
<input checked="" type="checkbox"/> Enable this Tab            Transfer Profit, Amount = <input type="text" value="0"/> from <input type="text"/> to the Tab <input type="text"/> for <input type="text"/> Send            Tab Profit Back/Lay <span style="background-color: yellow;">-0.26 / 0</span>													
Market Being Processed = <span style="background-color: green; color: white;">Basketball - Basketball - Golden State Warriors @ Oklahoma City Thunder - 01:35 Money</span> Clear Lay            Clear Back													
#	Date	Market Name	Sport	Selection Name	Bet_ID	Bet Type	Profit/Loss	Matched Price	Matched Stake	Cumulative Profit			
21	2/28/2016 1:2...	Basketball - Bas...	Basketball	Golden State Wa...	63497852305	Back		1.63	2.32				

I will cover more about the tabs later. Let's come back to the main interface of the bot.

Stop@Loss each tab	<input type="text" value="50"/>
<input checked="" type="checkbox"/> Continue with restart	
<input type="checkbox"/> Continue without restart	

If you remember, we discussed stop profit above and now, you should understand Stop@ Loss.

**Stop@Loss for each tab** –is the figure once passed the tab will either stop betting or restart.

Please keep in mind, bot will pass the stop loss figure, as it will place a bet, if the loss is below the stop loss, so remember, a 50 stop loss could actually be much higher. Once the stop loss has been passed it will either stop or restart (if option is ticked).

**Example:** *If Stop Loss is set at 50, and the tab has a Loss of say 48.00, the bot will still try and recover that 48 as it is under 50, so if the odds are say 2.00 the it will bet around 50 to recover the 48 loss plus the target. Meaning you will be at 98 should the bet lose. That is when the tab would stop trying to recover the loss.*

### Continue Button

This screenshot shows a settings window with a light blue background. It contains three rows of controls:

- Row 1: "Stop@profit per Match" followed by a text input field containing "1", a checked checkbox, and the text "Continue".
- Row 2: "Stop@profit each tab" followed by a text input field containing "10", a checked checkbox, and the text "Continue".
- Row 3: "Stop@profit all tabs" followed by a text input field containing "20", a checked checkbox, and the text "Continue".

Continue button will ensure that bot should not stop once the profit target is reached (per match or per tab) but it will start the fresh cycle. So, if you want to keep running the bot always, please keep continue button checked.

This screenshot shows a settings window with a light blue background. It contains the following controls:

- A label "Stop@Loss each tab" followed by a text input field containing "50".
- A checked checkbox followed by the text "Continue with restart".
- An unchecked checkbox followed by the text "Continue without restart".

Here you can see two buttons - Continue with restart and Continue without restart.

Once the stop loss has hit for any tab, then you would have option to continue betting as it is or start a new cycle.

**Very important** – Please use the option “Continue with restart” checked as otherwise you are exposing yourself to big risk. You may lose your bank if you have a losing run and continue without restart is checked.

This screenshot shows a warning dialog box with a light gray background and a thin purple border. It contains the text "Please remember that using this option may harm your bank" and an "OK" button at the bottom right.

Please remember when you select any **continue button**, you will get above pop up which need to click "OK". This is a mandatory Betfair requirement.

A screenshot of a 'Profit Delta' input field. The text 'Profit Delta' is on the left, and a text box on the right contains the value '.5'.

**Profit Delta** - This is another great feature we have on the back side of the bot. Profit Delta is the amount by which your next back bet stake will be increased once you the losing bet. For example, if your stop@profit target per match is \$1 and you have profit delta as \$.5, then if you have first match as a losing bet, then your 2<sup>nd</sup> target will not be \$1 but it will be \$1.5

Similarly, if your 2<sup>nd</sup> bet is also a losing bet, then your 3<sup>rd</sup> bet profit target will be \$2 (\$1+\$.5+\$.5) and not just \$1.

This is really great feature. It will increase your profit to a greater extent. (Obviously it depends what delta you keep). Anything between 20% to 50% of the original target profit per match is a good number.

A screenshot of a control panel with four buttons: 'Start' (green), 'Stop' (grey), 'Logout' (grey), and 'Clear' (grey).

**Start button:** - Once the settings are set the user, press the start button in order to start the bot.

**Stop button:-**press the stop button to stop the bot.

**Log out:-** press the log out button and you will come out of the bot.

**Clear button**

We have added a very special feature in the bot. **When you start betting next day, the bot will start from the same cycle where you left it last day** unless you use a clear button and start fresh day. If you want to continue the same cycle, don't use the clear button and just press the start button and let it run every day. There are respective **Clear** buttons for each tab. (Back and Lay sides) and overall clear button on the main settings for each side (Back and Lay).

Tab 1 Clear button for Back and Lay. It is start the fresh cycle when pressed

A screenshot of the 'Super Sports Bot v.1.6.1.1' interface. It shows a settings window with tabs for 'Settings', 'All Current Bets', 'Cancelled Bets', 'All Results', and 'Log'. The 'Settings' tab is active, showing options like 'Enable this Tab' (checked), 'Transfer Profit, Amount = 0', and 'Market Being Processed = Basketball - Basketball - Cleveland Cavaliers @ Toronto Raptors - 00:35 Moneyline'. On the right, there's a 'Tab Profit Back/Lay' section with a value of '-3.01 / 0' and two buttons: 'Clear Lay' and 'Clear Back'. A callout box points to the 'Clear Lay' button.

So, we have covered all settings for the back side.

Let's switch to Lay side.

As you can see, Lay side also has the same settings as we have on the back side. You can decide the market to bet and accordingly decide on the selections.

Rest every other function is same as what you have already seen on the back side.

Functionality of Continue, Clear, Continue with restart, Continue without restart are also exactly the same.

**The only difference in Lay side is that there is no profit delta.**

There is one box which you will see at the middle center of the interface.

```

2015-10-23 04:00:18 | Lay Clear Button Pressed
2015-10-25 12:16:08 | Back Clear Button Pressed
2015-10-26 20:03:20 | Lay Clear Button Pressed @ tab 3
2015-10-26 20:03:27 | Back Clear Button Pressed @ tab 3
  
```

It will show at what time you pressed the clear button last time. In the picture above, it tells me that

the clear button was executed by me on 23<sup>rd</sup> Oct morning, at 4:00am UK time. (My computer time is in UK time zone) and again on 25<sup>th</sup> and then on 26<sup>th</sup> (for tab3).

### Why is this important?

This feature will help in understanding at what time did you use the clear button last time. The bot will continue to show profit /loss from that time onwards.

As soon as you press the clear button, the bot will erase all staking sequence, profit /loss etc. and will start fresh.

When you click on the software manual button, you will get the link for the manual which you are reading now.

Betfair Help button will take you to the Betfair support page.

**UK wallet/ AUS wallet:** it will show the money you have in your accounts.

**Commission%:** User input Betfair commission

**API requests/Sec:** It shows you the number of API calls per second being requested from Betfair. As long as it is below 10, you are within the Betfair limit and no data charges will be charged to your account. We have designed the bot in such a way, that it should always remain under 10.

**Profit Back/lay:** - You will see consolidated profit or loss for all enabled tabs.

**Mexican wave:** - you will get more details on it later in the manual.

Market List	Country_League	Sports	21/02/16 05:00 Basketball _ Incheon ET Land Elephant v Ulsan	0
<input checked="" type="checkbox"/>	Basketball _ Incheon ET Land Elephant v Ulsan	Mobis Phoebus - 21/02/16 05:00	Incheon ET Land Elephant	3.9 15
<input checked="" type="checkbox"/>	Basketball _ Gunma Crane Thunders v Saitama Broncos	- 21/02/16 05:00	Ulsan Mobis Phoebus	1.19 227
<input checked="" type="checkbox"/>	Basketball _ Seoul SK Knights v Changwon LG Sorento	- 21/02/16 05:00		

As you can see, there is a space in the main interface where next match will also be shown.

It is just for the information purpose. It has nothing to do with the fact what the bot is doing.

It will continue to show the next match which is about to start regardless of the fact, if it qualified or not.

**Auto reload:-** This button (if checked) will keep loading the sports markets every 2<sup>nd</sup> hour. If you want to keep the bot running on your desktop/laptop or on VPS, please keep it checked.

We have segregated Australian markets out, as you can't place bet on them unless you have money in Australian wallet. So, please keep it unchecked if you don't have money in Australian wallet.

If Auto reload is marked, it will auto select all the markets which will be loaded after every couple of hours.

I always keep Auto reload checked.

[illegible]

In Current bets, you can see all the current bets which are not settled on Betfair yet. In the screenshot above, you can see I have no bets which are still open.

[illegible]

In Cancelled bet, you will see all the bets which could not get placed due to some reason and cancelled by the Betfair. You will rarely find bets in this box, as 99% of the times all qualified bets should get placed by the bot.

*										

Above is the screenshot from one of the tabs (tab 2)

Here you will see all the results for respective tab. At the top right corner, you can see how much profit-loss, the back and lay sides are making.

Format is - **Profit Loss (Back)/ Profit Loss (Lay)**

In the current screenshot, it is -.26/0 – it means tab 2 has making \$0.26 loss on the back side so far.

#### Transfer button:-

First important point is to enable the tab before starting the bot. You have provided with 10 tabs in this bot. You can use up to ten tabs in your day to day betting.

Enable the tab by checked box.

Now, if you are losing money on one tab, your next stake will increase accordingly for the upcoming bet. But if you have another tab where you have made some decent profit and you want to transfer some bit of that profit to the losing tab, you can do that with the help of transfer button.

***You can ONLY transfer from profitable tab to losing tab.*** You can transfer from back to lay or lay to back side but it has to be only from profitable tab to losing tab.

Obviously, one has to be rich in order to help the poor...same logic applies when we transfer the money.

You will also see the current match (as shown above) which has kept the tab blocked. There will always be only one match in one tab and next match will only come into that tab once the previous match is settled.

#### Sequencing for tabs (**if Mexican wave is not checked**):-

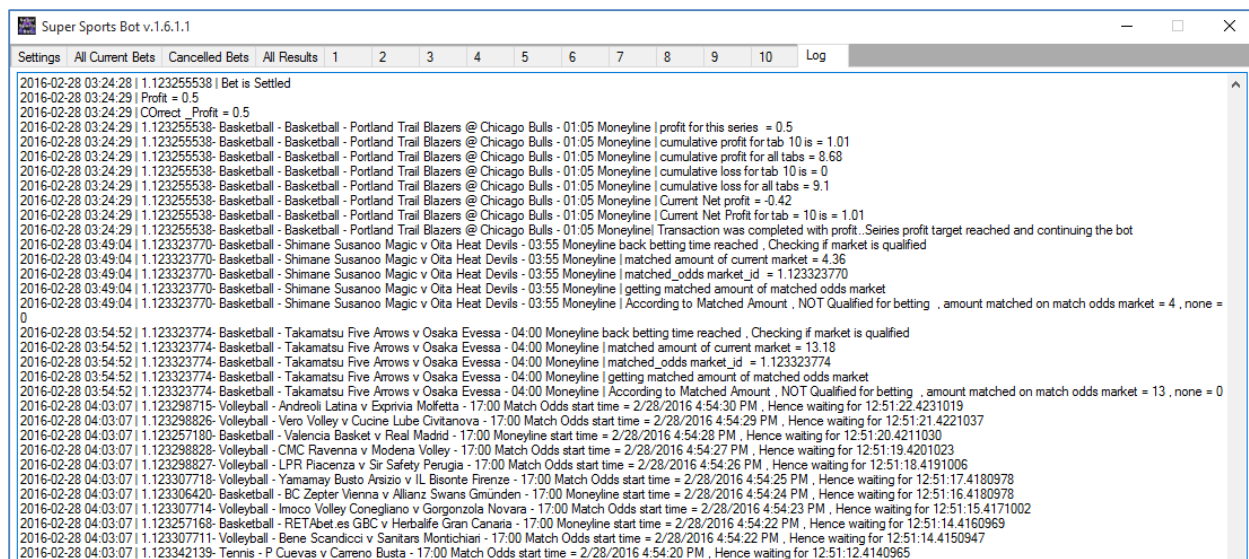

It is very important to understand the sequencing feature of the bot. As you know, we have 10 tabs in the bot and it can handle up to ten matches at the same time.

So, if at any given point in time, all tabs are occupied, it will not take any new bet unless any tab is free.

Also, it will always prioritize the tab which comes first. Say, we have two tabs free tab 1 and Tab 3 for the next match, and then it will take tab 1 for the next match.

#### Log tab:-

This is the important feature we have added in our bots. Now, the user can see what the bot is doing second by second. You may not be able to understand everything what is in the log but it is helpful in order to investigate any error.

You should be able to access the log file at the following address:-

C:\Program Files (x86)\Profit Sports Betting\Super Sports Bot\log\_files

## Strategy

### Backing

There is one strategy which I have used during testing phase; it has given us some decent profits.

I am using this strategy on all sports, Mexican wave checked, all 10 tabs checked. Since last 11 days, I am up +37 points. I had close to 65 plus matches so far which qualified in multiple sports.

### Laying Strategy.

These are settings you can try in the laying tab, on all sports. This is only a starting point, you will soon see patterns that you can exploit.

You can always change the strategies or build your own strategies as per your risk appetite.

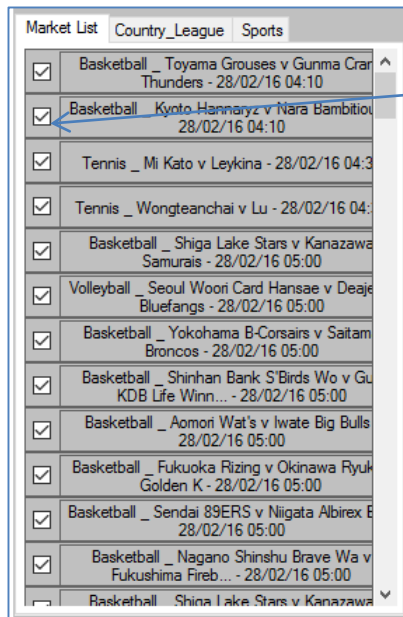

As I discussed, this bot will change the way Sports betting has ever been looked at. If we are making profits daily, then why can't you. Just don't be greedy and keep enjoying profits daily.

Below is a snap shot of a few days results.

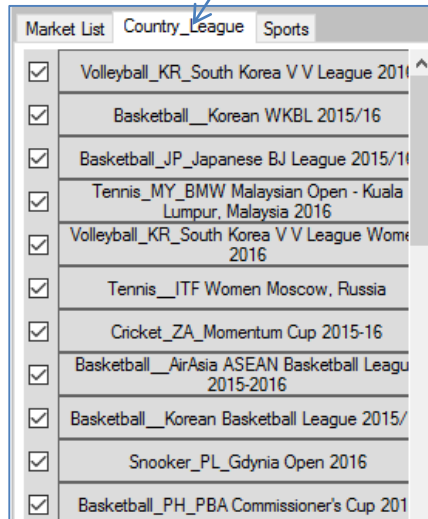

Super Sports Bot v.1.6.1.1

Let's discuss more features about SSB bot.

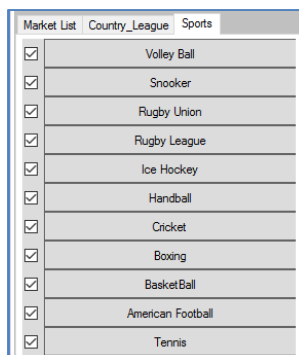

Deselect Leagues you don't want to bet.

We have the country filter which will enable you to deselect any league which you does not want to bet on. You can untick any game or untick any league before you press the start button.

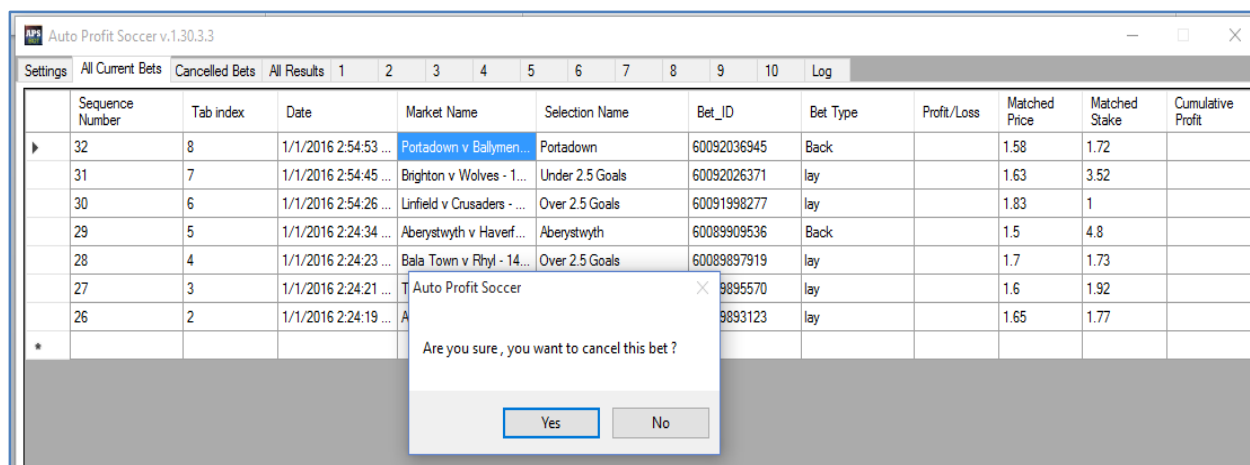

You can simply uncheck the league in the country league tab and it will automatically remove that league matches from the main list.

By default, all sports are checked. But if you don't want to bet on any sports, simply untick the same before you press the start button.

### **How to solve for unsettled bets in current tab markets and free up the tabs.**

You can cancel the bets in the current bets column if they are not settled for some reason. It may happen that for some reason (internet stopped or computer went on to sleep), the current bets would have stayed in the current bets tab and would not have settled and now user can cancel the bets in the current bets tab also by double clicking on the specific match.

Once you cancel any match, it will clear the tab for the next available match. Please remember, it is only cancelling the match from the bot but if the bet has been already placed on the betfair, then it will get settled on betfair for sure and however, not reported on the bot results. Because for bot purpose, the bet has been cancelled and stands no significance

### **I want to have same number of matches in every tab – Use Mexican Wave**

We have provided option for “**Mexican wave**”. So, it means that all the enabled tabs will be used at least once from 1 to 10 (if all 10 tabs are enabled) before they gets started again for next round of bets.

Hence, Mexican wave will ensure all tabs are getting the matches in equal ratio. Please keep it checked if you want equal distribution of matches across tabs.

### **All results are saved now**

All results are saved and won't get lost even if the bot is closed.

If you really want to clear all the previous results, please close the bot and delete the below excel file “All\_results” in the installation folder and open the SSB bot again.

C:\Program Files (x86)\Profit Sports Betting\Super Sports Bot

This PC > OS (C:) > Program Files (x86) > Profit Sports Betting > Super Sports Bot

### Consolidated Profit and Lay Box

Profit Back/Lay	10.81 / 4.08
-----------------	--------------

We have added a box ( as shown above) which will display the overall profit and loss for both back and lay sides since last time the clear button was used for various tab. Please remember clear button just clears the staking and overall profit and loss for various tab.

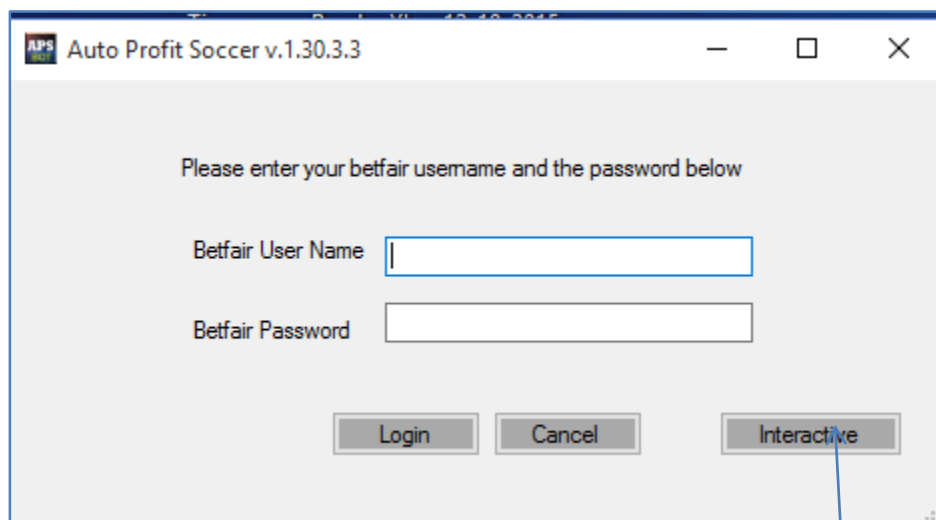

It is important to note that when you load the bot first time, it will take some time to load all the matches. We are sending multiple API calls to get all the markets (but within the Betfair API limit) and hence you will see that bot takes some time to load the market first time. (Time is close to 10-20 seconds depending on the speed of your internet). This latency is only there when markets are loaded first time when the bot is open.

Afterwards, all markets are reloaded by the auto reload function and then the bot will run as usual.

The other important to note, when you switch from back to lay, again the markets will be loaded again and hence you will see some latency when the shift happens.. Please give some time to bot to respond and settle down when you do the switch.

Any busy tab will be highlighted with green color.

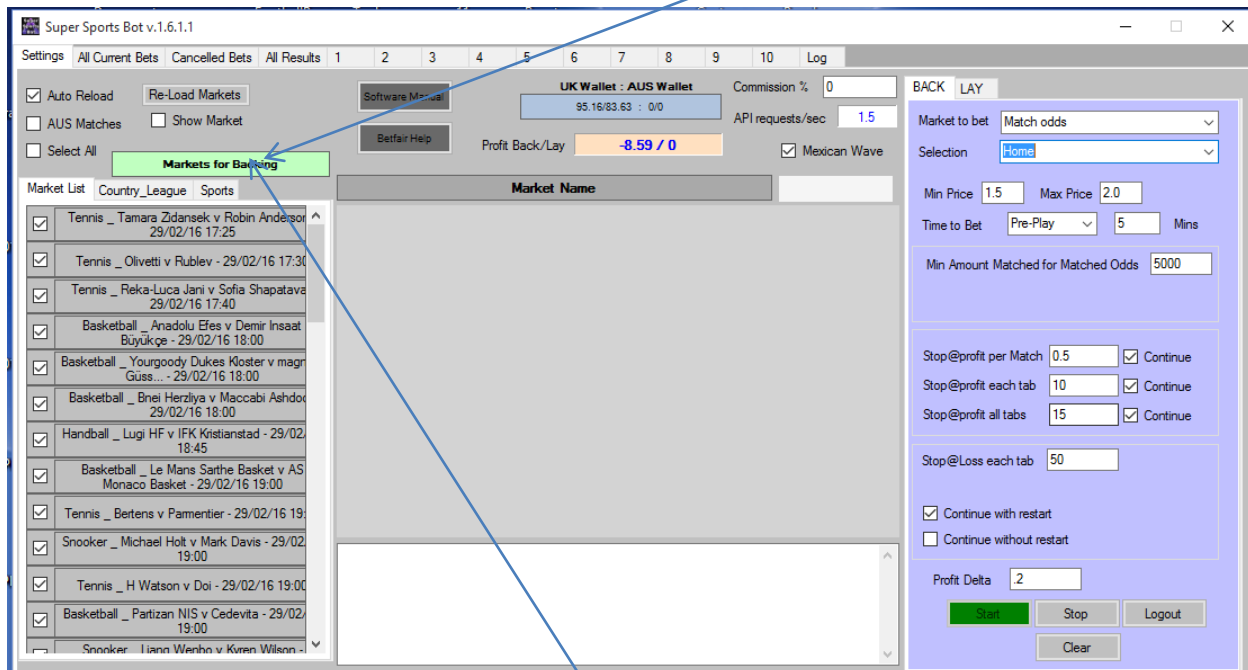

### **Danish Betfair Account Login Issue Solved**

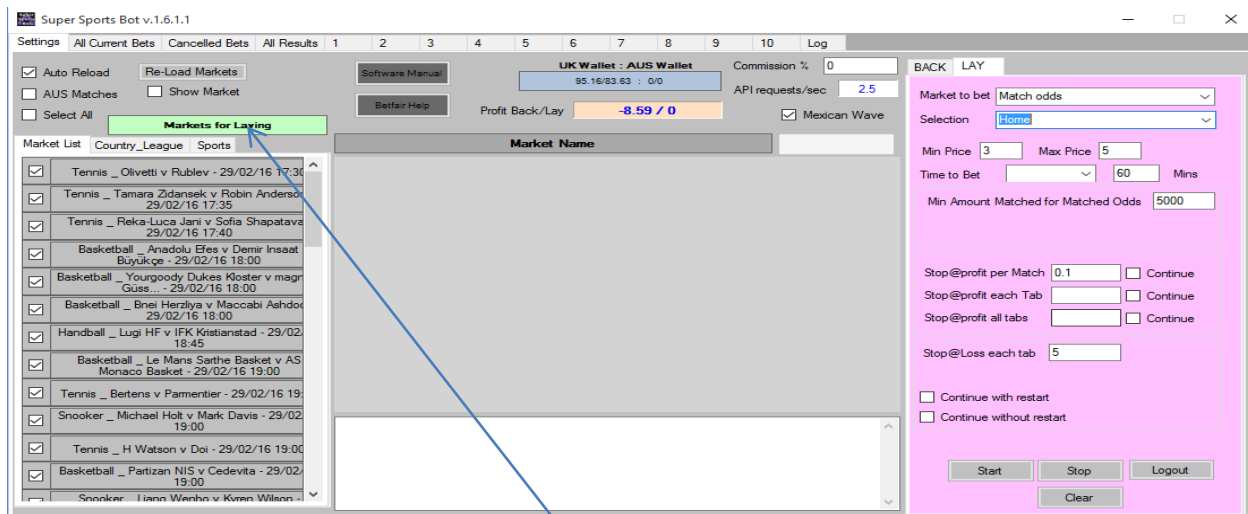

Only for Danish Betfair accounts, they need to login using Interactive. When you click on interactive, it will take to you step by step procedure required for opening the Danish Betfair account.

All other country betfair users can login using the normal procedure.

When you open the SSB bot, please make sure you have **correct markets** are loaded. It means, if you are planning to use back side, it should say “markets for backing” and similarly, when you switch to Lay side, it should say “markets for Laying”

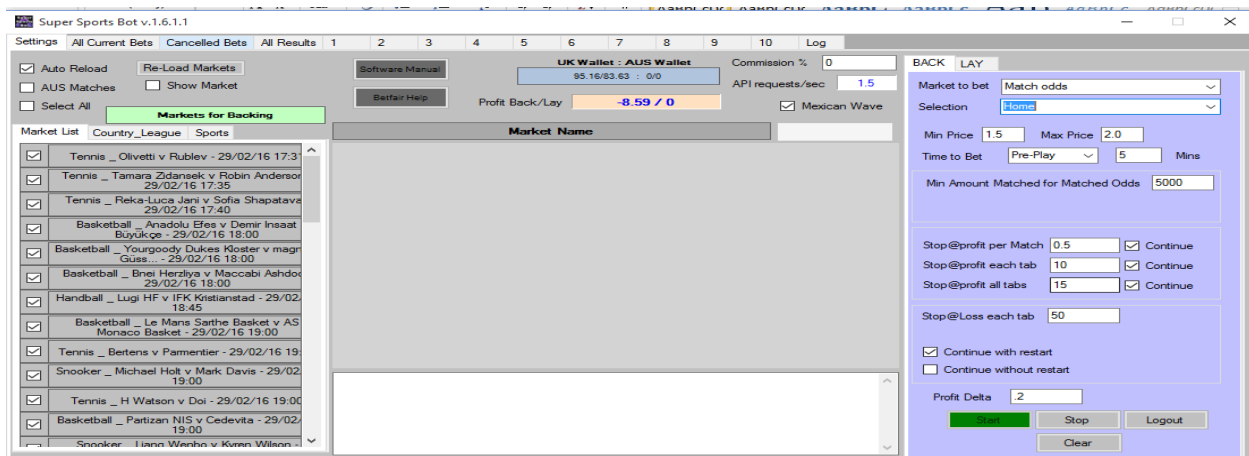

So, you can see above, I have opened the market and by default, it opened on back side and correct markets are loaded – “Markets for Backing” Ok, let me select Match odds. **Please remember, it will take close to 5 -10 seconds and Lay markets will be loaded.**

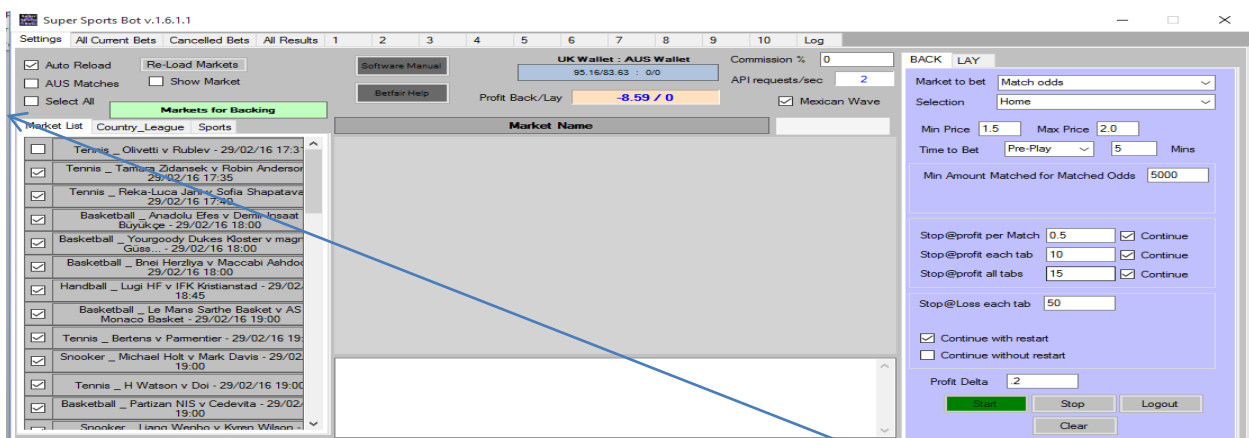

Now, you can see above markets for laying have been loaded.

Please remember that on one instance of SSB bot you can use one strategy of backing and one strategy for Laying and **both markets are completely independent.**

Now, say, I switch to Back side and selected match odds market and after 5-7 seconds interval, back side markets have been loaded up again.

So, all this plays a very critical role, if you have unticked any match – so it will be removed only from back or lay side depending on the markets loaded. If say back sidemarkets are currently loaded, and you have unticked any match or league, it will only be removed only from the back side and not on lay side.

As you can see the above match has only be unticked from the back side.

The other important point to understand is.

When you unticked any league, it will continue to be unticked in future unless you start the SSB again. For example,

Market List	Country_League	Sports
<input type="checkbox"/>	Basketball_TR_Turkish Super Ligi 2015/16	
<input checked="" type="checkbox"/>	Basketball_AT_Austrian Bundesliga 2015/16	
<input checked="" type="checkbox"/>	Handball_SE_Sweden HB Elitserien 2016	
<input checked="" type="checkbox"/>	Basketball_FR_French Cup 2015/16.	
<input checked="" type="checkbox"/>	Basketball__Adriatic Liga 2015/16	
<input checked="" type="checkbox"/>	Basketball_IL_Israeli Ligat HaAl 2015/16	
<input checked="" type="checkbox"/>	Tennis_FR_Quimper Challenger 2016	
<input checked="" type="checkbox"/>	Basketball_PL_Polish Basket Liga 2015/16	
<input checked="" type="checkbox"/>	Basketball_IT_Italian Lega A 2015/16	
<input checked="" type="checkbox"/>	Snooker_GB_Championship League 2016	
<input checked="" type="checkbox"/>	Tennis__ITF Women Campinas, Brazil	
<input checked="" type="checkbox"/>	Basketball_AR_Argentinian LNB 2015/16	
<input checked="" type="checkbox"/>	Basketball_US_NCAAB 2015/16	
<input checked="" type="checkbox"/>	Tennis_MX_Abierto Monterrey 2016	

I have unticked Basketball\_TR\_Super League in league list, and now, it will continue to be unticked till the time bot is not closed and start again.

So, you can just ignore the leagues which you don't want to bet on and it will bother you as long as your bot remains open.

Let me press reload button and show you how the country league will look like now.

Market List	Country_League	Sports
<input checked="" type="checkbox"/>	Basketball_AT_Austrian Bundesliga 2015/16	
<input checked="" type="checkbox"/>	Handball_SE_Sweden HB Elitserien 2016	
<input checked="" type="checkbox"/>	Basketball_FR_French Cup 2015/16.	
<input checked="" type="checkbox"/>	Basketball__Adriatic Liga 2015/16	
<input checked="" type="checkbox"/>	Basketball_IL_Israeli Ligat HaAl 2015/16	
<input checked="" type="checkbox"/>	Tennis_FR_Quimper Challenger 2016	
<input checked="" type="checkbox"/>	Basketball_PL_Polish Basket Liga 2015/16	
<input checked="" type="checkbox"/>	Basketball_IT_Italian Lega A 2015/16	
<input checked="" type="checkbox"/>	Snooker_GB_Championship League 2016	
<input checked="" type="checkbox"/>	Tennis__ITF Women Campinas, Brazil	
<input checked="" type="checkbox"/>	Basketball_AR_Argentinian LNB 2015/16	
<input checked="" type="checkbox"/>	Basketball_US_NCAAB 2015/16	
<input checked="" type="checkbox"/>	Tennis_MX_Abierto Monterrey 2016	
<input checked="" type="checkbox"/>	Tennis__ITF Women Nanjing, China	

Now you can see, after pressing the reload button, the Basketball Turkish league has gone. Actually I have done reloading manually just to show you as an example, but whenever next reloading happens, this league won't appear also.

**Please remember that Basketball Turkish league has been replaced from both back and lay side.**

In short, when you untick any match, say you untick it on back side, it will be gone only from back side and not from lay side.

**But if you untick any league, it will be gone from both lay and back sides. SSB will not place any bets on that league.**

When you start the bot the next time, all leagues will be loaded (including unticked one) so it will be a fresh start for the Super Sports Bot.

#### FAQs

**1. Can I use different Lay or different Back settings on each tab?**

No. You can use only one Lay and one back settings for all tabs

**2. I can't see prices moving on the main interface?**

Yes, prices will not move on the main interface. We don't want to waste API calls for price movement. Bot does all work in the background.

**3. My API per second is more than 10. What to do now?**

We have designed the bot carefully; it can't be more than 10. If it is, it can be because of slow internet connections or may be Betfair reason. But you won't be charged extra for data as our bot will not cross the permissible Betfair data limit.

**4. One of my bet stuck in one tab what to do?**

Please check on Betfair. It can be stuck because Betfair has not settled the market yet for some reason or your bot went off in between and Betfair settled the market during that time. Please remember as long as the bet will remain stuck in any tab, that tab will be occupied and won't get new bets.

In Betfair case, you should wait for market to be settled by Betfair. It happens rare as generally 99% of the times Betfair settles the market as soon as match is over. And in 2<sup>nd</sup> case, if Betfair has already settled the market and you have still bet on open, please use the clear button for that tab (back or lay). Clear it all or cancel the unsettled bet.

**5. I am confused on clear button?**

It will settle your tab to back to zero. All sequencing and staking will start fresh. We have clear button for each tab and for bot overall. Please read the manual to understand the feature in detail.

**6. Do you yourself use your bot?**

Of course, we run our bots 100% on VPS like our other SAW bots and APS. VPS is virtual private server. We use the following VPS server

<http://winningmore.com/VPS/>

**7. Where can I see what the bot is doing second by second?**

You can see in the log file in this folder. Log file is generated on daily basis.

C:\Program Files (x86)\Profit Sports Betting\Super Sports Bot\log\_files

**8. How can I export my results into excel?**

Use export button and it will download all results into csv format. Please remember that once bot is closed or clear button is used, all results will be lost.

**9. Do we have intent to add more features?**

Yes, we do but that all in next upgrades as we did not want to make it too complex for our clients.

**10. Does it generate daily profit?**

However, no one can guarantee success in betting world but we are almost there in making daily profit. All depends on settings. We always recommend you settings which we are using and profitable for us on daily basis.

**11. How will I receive updates?**

Whenever we do any update in the product, it will be done at the server end and you will be prompted to download the new exe. Please install it and use it with old key. No need to apply for the new key as long as your subscription is valid on that pc /desktop. Key is locked to that pc.

**12. Can I send suggestions what I want in future version?**

Yes, we always listen to our client feedback. Please send it across to Michael  
michael\_racing(a)yahoo.com

You can reach out to me for any questions. Email me on [Michael\\_racing@yahoo.com](mailto:Michael_racing@yahoo.com)
